Verbs are arranged alphabetically in a table format, one verb per page with English translation, and conjugated in all tenses and forms. Although the rules and the sheer quantity of forms might seem daunting to the beginner, the regularity of the patterns makes mastering of the Arabic verb a very achievable project with patience and a guide, such as this book. Trilateral Roots; Prefixes and Suffixes for Person, Gender, and NumberThe vast majority of Arabic verbs are built from a root consisting of three consonants. In the left-hand Arabic column, each of the Forms is represented by a verb in the perfect third-person masculine singular. Here is a table of the ten Forms, using the common root (a root that contains the idea of doing), as has been the custom of Arab grammarians for many centuries. Unlike the verbs in the languages of Europe, the Arabic verb brooks hardly any true irregularities, that is, forms that cannot be predicted by rules (such as the principal parts of to sing in English). Linguists therefore aspect. We retain the more familiar term, so beginners may think of the perfect and imperfect as analogous to the past and future of the European languages. . In preparing it, I had the help of an intelligent, efficient, and loyal team, consisting of Dr. Michael Rand, an expert Semitic philologist, who drafted the conjugations; Safwat Heneti, who drafted the examples; May Ahmar, lecturer in Arabic at Columbia University, who reviewed the examples for grammatical accuracy and stylistic correctness; and my wife, Janice Meyerson, who contributed her editor's expertise and her artists love of detail to the English portions of the book and to the preparation of the manuscript, plus an eagle eye that enabled her to raise some questions even about the Arabic. Page 3 Barron's 501 Arabic Verbs is printed in Arabic script with exemplary sentences in English for each verb. Verbs in Form I may be transitive or intransitive; that is, they may have an object, like to hit (as in He hit the child); intransitive, like to fall (as in I fell); or stative, like to redden (as in He reddened with shame). When learning the verbs of Form I, the middle vowel of the imperfect must be memorized along with the basic form (third-person perfect masculine singular). In dictionaries, the middle vowel of Form I words is often given in the form *a*, meaning that the perfect has *a*, the imperfect *a*; or *i*, meaning that the perfect has *a*, the imperfect *i*, and so on. Form II. In the second Arabic column, the same verb appears in the imperfect third-person masculine singular. Its meaning may range widely from the core meaning inherent in the root, depending on the Form and on usage as it has developed over the centuries. A verb can be modified to indicate mood, voice, tense, 1 person, gender, and number. Form I is the only Form whose vowel pattern is not absolutely consistent, for the vowel following the second letter of the root varies from verb to verb. Title: Five hundred and one Arabic verbs. But many verbs have *i* in the perfect and *a* in the imperfect, such as , imperfect ; some have *a* in the perfect and *i* in the perfect and in the imperfect, such as , imperfect ; and a few have *u* in the perfect and *u* in the perfect and in the imperfect, such as , imperfect . There are two sets, depending on which of the two tenses is being used. The perfect tense is inflected by means of these suffixes: he *-ashe* -atyou, masculine singular -*layou*, feminine singular -*til* -*tuthey* two, masculine -*they* two, feminine -*atyou* two, masculine and feminine -*tumthey*, masculine -*they*, feminine -*ayou*, plural masculine -*tumyou*, plural feminine -*tumawe* -*n* I The term tense is not strictly appropriate because, as explained below, Arabic verbs do not indicate the time of the action but whether the action is complete or not. The book's additional features include common idioms with example sentences to demonstrate verb usage and a grammar review. Linguists therefore prefer to use the term indicate the time of the action but whether the action is complete or not. III. Most commonly, this vowel is *a* in the perfect and *u* in the perfect and *u* in the perfect and in the imperfect. The term Bantu as a name for the group was coined (as *Bá-ntu*) by Wilhelm Bleek in 1857 or 1858, and popularised in his Comparative Grammar of 1862. He coined the term to represent the word for 'people' in loosely reconstructed Proto-Bantu, from the plural noun class prefix **ba* ...
