One app for meetings, phone, and chat

Facebook Lite is an official Facebook client that lets you use this popular social network through a much lighter app that's better suited for low-power Android devices or ones with limited Internet connections. The first thing that stands out about Facebook Lite is that the app takes up about 250 kilobytes on your memory once installed. This means that it occupies a hundred times less space than the standard Facebook app—and still has all the features you need from it. Besides this drastic size reduction, Facebook Lite offers other interesting advantages for users with limited Internet connections. The app is expressly designed to work over 2G networks, so it lets you access your profile and communicate with your friends while consuming hardly any data. Facebook Lite is an excellent alternative to the usual Facebook client that lets you use this social network on less powerful devices and over very weak Internet connections. Lo primero que llama la atención de Facebook Lite es que la aplicación ocupa unos 250 KB de memoria una vez instalada en el terminal. Para que nos hagamos una idea, esto quiere decir que Facebook Lite ocupa más de 100 veces menos que la aplicación normal de Facebook... y conserva todas las prestaciones que debería tener. Al margen de esta drástica reducción de tamaño, Facebook Lite ofrece otras ventajas muy interesantes para usuarios con conexiones a Internet poco potentes o limitadas. La aplicación está diseñada expresamente para trabajar en redes 2G, por lo que nos permitirá acceder a nuestro perfil y comunicarnos con nuestros amigos con apenas consumo de datos. Facebook Lite es una excelente alternativa al cliente habitual de Facebook que nos permitirá hacer uso de la red social en terminales muy poco potentes o con conexiones a Internet muy malas. Share your favorite events live or record them as video messages that automatically disappear without leaving a trace after a few seconds. That said, for anyone to get your snaps, they'll need to have the app installed as well. As an added security measure, anytime you send a photo, and someone takes a screenshot, you'll get notified, so you're always in the know on who has pictures of what. Once upon a time, Snapchat was simply a means to an end: basically, sending dirty pictures that could be easily erased.
